

iOnYou™

Record. Annotate. Present.

RECORD

- Record video directly to your iPad 2 in high definition
- Each video is instantly catalogued by activity, participant, group, event & sub-category (for athletics, you can re-label to read sport, athlete, team, event and sport sub-category).
- Uses the full iPad 2 screen so you don't miss any action

"iOnYou will be incredibly helpful to my coaches on the gym floor. Immediate feedback is great but I love the idea of uploading videos to each athlete's account for review by the athlete at home. It really leverages my time and extends my coaching power!"

Tom Forster
Head Coach, Aerials Gymnastics

ANNOTATE

- Analyze video using voice, drawings and angle analyzer
- Move video back, forth and in slow motion while commenting or drawing
- Advance video frame by frame for exceptionally detailed review
- Annotate for later review and publishing or for immediately review with the video subject

PRESENT

- Instantly broadcast annotated videos to members of your group with private accounts on our website, iOnYouVideo.com.
- Video publishers can monitor who among their group watched their videos online and for how long. Great for coaches serving whole teams with corrective video.
- Play annotated video right on your iPad 2 or on a big screen immediately after annotating.
- Locate videos in the iPad 2 or online by activity, participant, event, sub-category, date, keyword or clip name.

SHARE

- Participants (e.g. athletes) may export videos from the website (with or without annotations) to YouTube and Facebook or share them via email.
- Application users (e.g. coaches) may share videos directly from the iPad 2 with destinations such as YouTube, Facebook and email.
